

OUR MISSION...

REVAMP creative process outcome are unique objects or series of items. Everything we produce is handcrafted. Materials such as wood, copper, metal and low-VOC finishes are re-used to achieve the lowest footprint possible. Therefore, each piece is absolutely unique.

We love to think and blend styles and functionalities, while being focused on sustainability, re-using materials, ideas and concepts. The products, partnerships and collaborations are always aiming to showcase unique, well-designed products and services that are practical, timeless and sustainable.

We purposely make the piece with possible imperfections in mind. We believe scuffs and scratches enhance the look of every piece's result. We clean and sand the materials from remains of cement and dirt, but signs of previous painting, oxide or traces of existing nails may remain.

THE MEMORY OF THE MATERIAL
IS NOT TOTALLY ERASED
YET IT'S BROUGHT TO A NEW LIFE.

WHAT WE DO...

REVAMP is an independent multi-disciplinary Studio based in Barcelona, leaded by Marisol Gonzalez Nohra, creative designer (former Usame founder).

OUR WORK SPANS THROUGH A RANGE OF DISCIPLINES FROM FURNITURE AND LIGHTING TO INTERIOR DESIGN AND FULL BRANDING

We thrive on the challenge of creating green, useful and beautiful objects and experiences. There are threads that run through all of our work - an interest in nature, a passion for exploring materials and aesthetics, and a desire to create objects, experiences and environments that enhance the feeling of happiness and wellness.

SUSTAINABILITY AND SCAFFOLDING WOOD...

We work to reduce our impact at every level of our practice. This makes a big difference in the creative thinking, in the materials we choose, in the production processes and through our supply chain. An example: Scaffolding wood trees grow very fast, so the use of this wood contributes to avoiding deforestation. Products made with this wood are considered "green" around the world for this reason. Besides the fact it is a recycled material.

**AFTER A 5 YEARS USE FOR CONSTRUCTION,
THE SCAFFOLDING WOOD THAT REVAMP SELECTS BECOMES
FURNITURE, PANELLING WALLS, FLOORS AND CEILINGS.**

Used scaffolding wood brings different low footprints and every item has its own different marks. It is a type of hard pine, with a long fibre, that gives elasticity and makes it resistant to temperature changes and harsh weather conditions. Scaffolding wood has this rough appearance and a grey color for being outdoors for a long time.

This wood is difficult to work, because it has different thicknesses, but it is precisely these inequalities that make it authentic. We clean and sand it to avoid splinters but keeping the "old" aspect of recycled wood.

IS NOT ONLY RECYCLING, IT IS REVAMPING...

Selection of materials is very important for us. At REVAMP we not only select re-used materials, but also the ones that we can give a new shape or use. The closer we find them, the less they are processed, the best energy saving is done. Our new items includes copper pipes, plastic fruit crates, and the use of color to contrast the old re-cycled wood.

Most of our pieces are designed to be customizable, we can tailor the scale, shape and colour of our designs to suit your needs. Our creative/branding services follow the same premises as our pieces.

WHO WE ARE...

Marisol González Nohra, Creative Designer, born in Lima, came to Barcelona fifteen years ago and graduated in Editorial Design at Barcelona University. After working some years in advertising agencies, with an eye for design, and a passion for interiors, she became in 2010 co-founder of Usame, furniture design company based on re-using reclaimed materials. Today, she revamped the brand and divides her time between creative consulting, furniture design and her son, Luca.
